Hello all, this month is the month where we get the kids back to school, most of the Vacations are over, and it's time to GET BACK TO WORK!

Like most of you, I have taken a few days here and there this summer to spend with my family, but mostly they have been in the East visiting, and I got to do things I'll be honest I don't normally do... like Laundry ☺ We all have our tasks around the house and well my wife got that one. For some reason while in Montreal, she would not do mine in Calgary!!

Here is what I learned 1st hand 15ml of laundry detergent is **NOT** very much but boy it sure goes a long way.... Can you imagine doing a whole load of wash with only 15ml. I have been telling you that my wife likes the stuff, and well I have to say, "I'm impressed too!" So much so (No I didn't buy the company, like that Remington guy) but, I have convinced CANSEW to help me get all of you to try it for yourselves!!!

SO

Agencies Inc

NACR Agencies in has grown by one!

The newest member of team NACR is Leslie, she is mother of one and about to be at any moment a mother of 2, who wanted contact with the outside world, while taking care of her family.

NACR was looking for someone who can spare a couple hours a day helping with phone calls, and follow ups, so this is a perfect match. She has been working now only a week or two but, the feedback has been amazing and I'm sure you will like her when you get a chance to speak to her....

Feel free to ask her questions as she does speak to Ryan very often and will help get those answers.... Well I guess unless she is off having child # 2!

Ryan is traveling more and more and with the new cell phone law limiting the manner in which he makes calls this is great timing... So welcome Leslie and thank you for all your help!!!
